

Corevist Commerce FAQ

**MODULAR. CLOUD-BASED.
LIGHTNING FAST IMPLEMENTATION.**

Your questions, answered. →

Can you support a company our size?

Due to Corevist's size, **we're fast and agile.** Our clients process hundreds of millions of dollars a year through the B2B customer order portals we provide. Everyone from the smallest client to the Fortune 100 run on the same code.

Speaking of which, we release patches and updates weekly, not quarterly. We're built to scale with you.

You pitch simplicity a lot, but our business rules aren't simple at all. Can you handle our complexity?

Absolutely! Our customer portal extends the relevant logic in your SAP system directly to the B2B ordering portal we provide. All of your pricing rules, discount rules, sold-to/ship-to, minimum order, quantity rounding, and more—no matter how complicated, we make it simple for the purposes of ecommerce by not replicating it. **Think of your Corevist B2B ordering portal as a window to your SAP system, not a mirror.**

What makes you different from other ecommerce solutions?

With other solutions, your IT team must take on the burden of "owning" your ecommerce infrastructure.

That's no small task (and it never ends).

Corevist is different. We offer you "one throat to choke" for all things ecommerce:

- **The platform, Corevist Commerce.**
- **The implementation with prebuilt, configurable SAP integration.**
- **Hosting, support, and professional services.**
- **We help you grow the web channel.**
